About Shuttle

Established in 1983, Shuttle Inc. is based in Taiwan with an extensive worldwide network of subsidiaries, resellers, partners and suppliers. With over 30 years in desktop relative design, manufacturing and work with Intel®, AMD, and NVIDIA, Shuttle has the affirmed superior quality of products and services. Keeping "Innovation, Quality, Integrity and Service" in mind, Shuttle produces the best quality products at a competitive cost to meet its customer's needs. Shuttle has received numerous international awards due to its advanced thermal technology and mechanical design and has passed ISO 9001 and ISO 14001 certifications.

Since the creation of the world's first-ever mini-PC in 2001, Shuttle Inc. has been recognized as an industry leading designer and manufacturer of small form factor (SFF) computers and accessories for consumer and commercial sectors. Experienced in small form factors and thermal technology, Shuttle XPCs are now applied to Digital Signage, Point-Of-Sales, Kiosk, and Access control vertical solutions. Shuttle offers its vertical customers the most cost effective and customizable hardware solution options. Shuttle's product profile includes a range of entry level to high performance Slim PCs, Mini PCs, All-in-One PCs, Biometric solutions, and Network Attached Storage platforms. With 30 years of R&D experience, Shuttle has launched into the private cloud storage market with its own brand, OMNINAS. All Shuttle products use the highest quality materials and parts, with excellent cooling technology and low-power consumption.

Whether your business operates in hospitality, retail, banking, transportation, government, healthcare, education, or security, Shuttle can provide the solution you're looking for to increase your competitiveness in business.

Shuttle Unique Features

Always Cooled

Shuttle's innovation in thermal heat pipe technology is a key ingredient to its success in small form factor design. The slim PC and All-in-one models adopt a heat pipe cooling design while the XPC series features Shuttle's Integrated Cooling Engine (ICE™) to efficiently cool the system. ICE™ uses heat conduction, convection, and thermal radiation processes to disperse waste heat from inside the computer while smart vents create continuous airflow.

Always Slim and Compact

Shuttle systems are slim and compact, designed to be easily integrated into digital signage, kiosk, video wall, menu board, and POS applications. Shuttle provides its customers with flexible options, including the Slim series, All-in-One, and XPC models. Whether for entry-level or high-performance applications, Shuttle has built-in as much flexibility and performance into each product as possible to support the latest innovations in each segment.

Always Green

Shuttle's digital signage models use an exclusive low-power and low-noise design. All products have been tested to meet international energy saving standards and the power-saving requirement of the 2013 Energy-related Products Lot 6 (ErP Lot 6). The fanless models are completely silent and allow the systems to operate with low-noise and high stability.

24/7 Nonstop Operation

All of Shuttle's digital signage models are 24/7 certified and deliver continuous low power operation. In addition, all XPC models have received 80 PLUS Certification. 80 PLUS is an initiative to promote energy efficiency in computer power supply units. Shuttle provides stable operation and energy savings, making them well-suited for vertical markets.

Support HD Video & Multi-display

Shuttle uses high performance processors, allowing customers smooth playback of a variety of Full HD and even UHD 4K videos. Shuttle's high-end models can even be used for video walls, providing customers with the best solutions for multiple digital signage applications.

The Watchdog - Protecting System Security

The full range of Shuttle's digital signage players support watchdog security functions for digital signage systems that need to operate continuously for long periods of time. Watchdog is an electronic timer that is used to detect and recover from computer malfunctions, giving customers peace of mind that unmonitored digital signage systems will not fail.

Note: All of Shuttle's computer products have passed power loop, endurance, high and low operational temperature loop, structural strength, durability, and thermal shock+vibration tests in an environment with ambient temperatures between 0°C~50°C (0°C~40°C for fanless models).

4K High Performance Digital Signage Player - DS81 & XH81 series

Compact, extremely powerful slim PCs built to meet the requirements of high-end digital signage and kiosk applications. Shuttle's 81 series are among the highest performing signage players on the market, designed to support highly interactive software and deliver UHD 4K graphics. The barebone platforms support 4th generation Intel® Core™ i3/i5/i7 processors with built-in Intel® HD graphics and offer lots of room for expansion via two mini PCIe slots. The series is made with quality materials to ensure highly stable and long-term continuous operation. The ultra slim 1 liter and 3 liter clients are VESA mount-ready and easily integrated into display devices and kiosks with limited space. The series features advanced thermal technology with a smart fan plus heat pipe module, keeping the system at very low temperatures.

Deliver Ultra HD (4K) resolution

Built to drive stunning visual graphics with UHD 4K video resolution. With one built-in HDMI port and two DisplayPorts, the series delivers dual display output to monitors of all sizes with compatible resolution.

Heat Pipe Cooling Technology - 24/7 Operation

The 81 series are made with Shuttle's exclusive heat pipe technology and smart fan design. Ventilation slots are precisely placed around the device, creating constant air flow and removal of waste heat away from the system. Adopting ball bearing fans for a longer life span than traditional sleeve bearing fans, the design makes for a cool, whisper-quiet, and stable 24/7 operation.

Multiple I/O for Greater Connectivity

Designed to power hardware systems that require lots of peripheral connectivity. The 81 series has robust I/O interface with full USB 2.0 and USB 3.0 ports, COM ports, Display ports and HDMI ports, in addition to dual LAN ports. The XH81 can also be fitted with five COM ports* for applications which require additional connectivity to peripherals.

*The XH81 front panel can be configured with either three (3) COM ports or one (1) ODD bay depending on customer preference.

Application Fields

4K Digital Signage

Self-service Kiosk

Vending Machine (XH81 ONLY)

Digital Whiteboard

Office

DS81 Front Panel

- F1. Microphone Jack
- F2. Headphone Jack
- F3. Power LED
- F4. HDD LED
- F5. Power Button
- F6. SD Card reader
- F7. USB 2.0 Port

XH81 Front Panel

- F1. USB3.0 Port
- F2. USB2.0 Port
- F3. Mic-In
- F4. Headphone
- F5. Power Switch / Power LED
- F6. HDD LED
- F7. Slim ODD Bay

DS81 Back Panel

- B1. Power Connector
- B2. LAN Port
- B3. COM Port
- B4. USB 3.0 Port
- B5. USB 2.0 Port
- B6. Display Port
- B7. HDMI Port
- B8. Clear CMOS & External Power on header
- B9. Antenna hole

XH81 Back Panel

- B1. DC Power Port
- B2. COM1 Port (RS232/RS422/RS485)
- B3. HDMI Port
- B4. C-CMOS
- B5. USB2.0 Port
- B6. Mic-In Port
- B7. Line-Out Port
- B8. D-Sub (VGA) Port
- B9. Kensington Lock
- B10. Display Port
- B11. LAN Port
- B12. Line-In Port

Specification

	DS81	XH81/ XH81V
Supported Processor	Intel® 4th Generation LGA1150 CPU Intel® Core i3/i5/i7, Pentium®, Celeron® processor Support Haswell™ / Haswell re-fresh™ Max. 65W CPU	
Chipset	Intel® H81 Express	
Video Engine Processor	Intel® HD Graphics Series integrated in CPU (Dynamic Video Memory)	
Memory	2x DDR3 1600 MHz SODIMM, Max. 16GB

Core i7 High Performance Digital Signage Player - DS61V1.1, XH61V

Shuttle's 61 series is a slim but powerful digital signage platform offering quality, performance, and connectivity to meet the processing requirements of high quality digital media. These products adopt Shuttle's exclusive heat pipe cooling module with Smart Fan design. Their energy consumption is as low as 90W and features ultra-low noise operation. The series is made for easy installation into digital signage and kiosk hardware systems with low energy consumption. Shuttle's 61 series supports Intel® Sandy/Ivy Bridge Core™ i3/i5/i7 65W high-performance processors with built-in Intel® HD Graphics. These products also have built-in RS232/RS422/RS485 interfaces to meet a variety of application needs.

Flexible choice of processor to meet versatile application needs

Shuttle's 61 series products support 3rd Generation Intel® Core™ i3/i5/i7 processors. A number of CPUs can be selected to meet various needs, improve performance, and meet a variety of application requirements

Heat pipe cooling Technology

Shuttle's smart fan plus heat pipe cooling module uses a copper block with capillary vacuum design to absorb heat inside the machine. Ventilation slots are precisely placed around the device, creating constant air flow and removal of waste heat away from the system for a stable and long-term operation.

VESA Mount Capability

The compact DS61 V1.1 has multiple screw holes specially designed on the side of the body. The design complies with International VESA Mount Standards while still allowing users to choose the most appropriate back hanging configuration and placement. This space saving feature is perfect for digital signage applications with limited space.

Application Fields

Full HD & Fanless Digital Signage Player - DS437 Series

The DS437 series features an ultra slim platform with enough processing power to meet the demands of today's digital signage and kiosk innovations for Full HD video and rich interactive media. The DS437 has a mere body thickness of 39.5mm and integrates an Intel® high-performance Celeron dual-core processor. The fanless design ensures 24/7 reliable operation at cool temperatures over extended periods of time. The series boasts a strong I/O interface for connecting to peripherals, including built-in COM ports (DS437 only), USB 2.0, USB 3.0, Gigabit LAN, HDMI, and DVI-I interface. Customers can enjoy display of Full HD digital media with impressively low power consumption (65W).

Fanless Design

The DS437 series uses a thermal heat pipe module to transmit heat throughout the device quickly and evenly. Ideal for commercial applications where continuous operation is required, high cooling efficiency is achieved without cooling fans. With smart vent design, the waste heat inside the computer can be removed quickly and efficiently.

Support dual-screen display

Shuttle's DS437 series provides HDMI and DVI-I dual-screen display to support HD video content. An adaptor can be used to convert HDMI into DVI interface and DVI-I port into D-Sub interface to diversify signal selection options for dual monitor and standalone display.

VESA Mount Capability

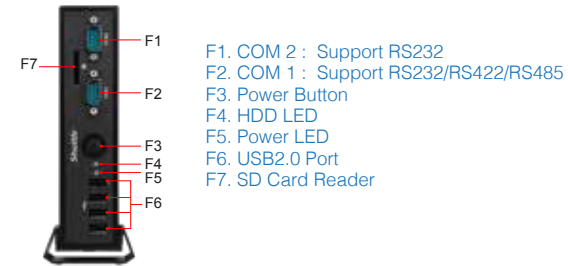

The compact DS437 series has multiple screw holes specially designed on the side of the body. The design complies with International VESA Mount Standards while still allowing users to choose the most appropriate back hanging configuration and placement. This space saving feature is perfect for digital signage applications with limited space.

Application Fields

DS437 Front Panel

- F1. COM 2 : Support RS232
- F2. COM 1 : Support RS232/RS422/RS485
- F3. Power Button
- F4. HDD LED
- F5. Power LED
- F6. USB2.0 Port
- F7. SD Card Reader

DS437T Front Panel

- F1. SD Card Reader
- F2. Power Button
- F3. HDD LED
- F4. Power LED
- F5. USB2.0 Port
- F6. USB3.0 Port

DS437 Back Panel

- B1. Clear CMOS & External Power on header
- B2. DVI-I Port
- B3. HDMI Port
- B4. Mic-In
- B5. Headphone
- B6. USB3.0 Port
- B7. LAN Port
- B8. DC IN

DS437T Back Panel

- B1. Clear CMOS & External Power on header
- B2. DVI-I Port
- B3. HDMI Port
- B4. Mic-In
- B5. Headphone
- B6. USB3.0 Port
- B7. LAN Port
- B8. USB2.0 Port
- B9. DC IN

Specification

	DS437	DS437T
Integrated Processor	Intel® Celeron™ 1037U processor ,Max. TDP 17W

Accessories	Stand, VESA mount kit	

XS36V4

Affordable Full HD Digital Signage Player - XS35V4 & XS36V4

Shuttle's new XS35V4 and XS36V4 signage players are capable of playing full HD video flawlessly, designed for POS, POI, queuing machine and digital signage applications. Both are equipped with an Intel® Bay Trail processor for lower-power consumption and energy saving. The XS35V4 and XS36V4 feature a respective body thickness of only 38.5mm and 36mm and an ideal cooling thermal module design to ensure long-term stable and silent operation without a cooling fan. The combination of VESA mount capability and Multiple I/O interface, including built-in USB2.0 and USB3.0 ports, D-sub, HDMI, display ports, COM ports, and Gigabit LAN makes for easy connectivity with peripheral devices.

Fanless Design

The XS35V4 and XS36V4 use a thermal heat pipe module to transmit heat throughout the device quickly and evenly. Ideal for commercial applications where continuous operation is required, high cooling efficiency is achieved without cooling fans. With smart vent design, the waste heat inside the computer is removed quickly and efficiently.

Intel® Bay Trail Platform Technology

The XS35V4 and XS36V4 are equipped with Intel® Bay Trail platform technology, using a 22 nm Intel® Celeron® processor with energy saving. The CPU integrated Intel® HD graphics is capable of playing Full HD video flawlessly.

Energy Saving & Extremely Quiet

Shuttle's exclusive low-power design and fanless cooling module results in a 34%-38% reduction in noise during system operation as compared to regular computers. This extremely quiet operation is suitable to application environments that demand quietness. In addition, a mere 40 watts of power is sufficient to maintain normal system operation.

Application Fields

XS35V4 Front Panel

- F1. Power Button
- F2. Power Status LED
- F3. HDD Status LED
- F4. SD Card Reader
- F5. ODD/ Second HDD (Optional)
- F6. USB 2.0 Port

XS36V4 Front Panel

- F1. Power Button
- F2. Power Status LED
- F3. HDD Status LED
- F4. Serial Port (COM1,COM2)
- F5. SD Card Reader
- F6. USB 2.0 Port

XS35V4 Back Panel

- B1. Microphone Jack
- B2. Headphone/Line-out Jack
- B3. LAN Port

Cost effective Digital Signage Player - XS35 & XS36 series

Shuttle's slim multimedia player XS35 and XS36 series is an affordable fanless solution for business applications, such as POS, POI, and Digital Signage. The XS35 and XS36 series is equipped with Intel® Cedar Trail-D platform technology as well as an energy saving Intel® Atom™ dual-core processor. The compact XS35 and XS36 series feature a respective body thickness of only 38.5mm and 36mm and come VESA mount-ready for easy configuration. In addition, the series is rigged with multiple I/O to support single or dual display and connect to peripherals.

Fanless Heat Pipe Cooling Technology

The XS35 and XS36 series use a thermal heat pipe module to transmit heat throughout the device quickly and evenly. With smart vent design, waste heat is removed quickly and efficiently without the use of cooling fans to maintain high stability for long-term operation.

Energy Saving & Extremely Quiet

Shuttle's exclusive low-power design and fanless cooling module result in a 34%-38% reduction in noise during system operation as compared to regular computers. This extremely quiet operation is suitable to application environments that demand quietness. In addition, a mere 40 watts of power is sufficient to maintain normal system operation.

Noise Comparison Table

	Idle Mode	Full load Mode
Regular computer(dBA)	27.6	32.4
Shuttle XS35 and XS36 series(dBA)	18.2	20.1
Reduction (%)	34%	38%

Application Fields

X70 series Front/Rear/Side Panel

All-in-One Touch for Business Solutions - X50 & X70 series

Shuttle's All-in-One X50 and X70 series is made to be applied in a variety of business settings, including POS, POI, Kiosk, control system, queuing machine and communication platforms. Both the X50 and X70 series models support touch function* and adopt a compact and stylish design with built-in I/O interfaces for diverse peripheral connection. The X50 series fanless design adopts a heat pipe cooling module to satisfy the demands of high operational stability while reducing customers' maintenance costs.

*Note: The X50V2 PL and X70N do not support touch function.

Heat Pipe Cooling Design

Shuttle's All-in-one thermal cooling module uses heat pipe technology to disperse heat throughout the system quickly and evenly. The series uses smart vent design to remove waste heat from inside the computer and maintains cool operation of the system.

24/7 Nonstop Operation and Energy Saving

Shuttle's All-in-one's have passed stability testing for 24/7 nonstop operation. Integration of Shuttle's low-power design with the new Intel® dual-core processors results in reduced costs of operation.

A Variety of Expansion Interfaces for Easy Connection to Peripherals

Shuttle's All-in-one models provide a diverse I/O interface in addition to an optional RS232/LPT accessory for customers who need added connectivity with peripherals. These models are fit for vertical application such as POI, POS, KIOSK, queuing machine and Digital Signage.

Reliable and Powerful Mini-PC - The XPC series

Shuttle's industry renowned XPC series is only 1/3 size of a traditional tower PC yet delivers the same performance as regular computers with high durability. The XPC series is equipped with Shuttle's I.C.E.2™ heat pipe technology to efficiently distribute heat to the outside of the machine. The XPC series supports the latest generation of Intel® processors and provides a variety of I/O interfaces for strong expandability. The XPC series features impressive performance to support diverse commercial applications, including video walls and mini servers.

Integrated Cooling Engine 2 (I.C.E. 2) Heat Pipe Technology

Shuttle's Integrated Cooling Engine 2 (I.C.E. 2) uses convection cooling to dissipate heat away from and around the CPU. The copper tubes, coated in nickel for enhanced tube hardness and rust-proof protection, are filled with distilled water to effectively channel heat.

80 Plus Certified Power Supply - Energy Saving

The XPC series are equipped with an 80 Plus power supply that features high energy efficiency and energy saving. Shuttle's 500W power supply is perfectly to be used to eliminate the unnecessary power consumption to achieve the higher level of certificate standard requesting energy saving.

Dual-slot Graphics Card Support and Strong Expandability

The XPC series is equipped with one PCI-e x16 slot (support Dual slot VGA card) that provides excellent support for digital signage with video walls. With built-in USB ports (up to 10) and optional expansion cards with RS232 interface, the series easily connects to diverse peripherals to meet multiple applications.

* The largest volume of graphics cards supported is 273x98x42 (LxHxD)

Application Fields

XPC series Front Panel

- F1. 5.25" Bay
- F2. 3.5" Bay
- F3. Eject Button
- F4. Open Door
- F5. Power Switch & Power LED
- F6. HDD LED
- F7. USB3.0 Ports
- F8. USB2.0 Port
- F9. Mic In
- F10. Headphone
- F11. USB2.0 Port & Fast Charger

XPC series Back Panel

- B1. AC Power Socket
- B2. Serial Port (Optional)
- B3. S/PDIF Out Port
- B4. DVI-I Port
- B5. HDMI Port
- B6. eSATA & USB2.0 Port
- B7. USB3.0 Ports
- B8. Clear CMOS Button
- B9. Front Speaker Out (L/R) Port
- B10. Side Speaker Out (L/R) Port
- B11. Real Speaker Out (L/R) Port
- B12. Center/Subwoofer Speaker Out Port
- B13. Line-In Port
- B14. LAN & USB2.0 Port
- B15. Wireless LAN Perforation (Optional)

All-in-One Face Recognition Solution - The HR70 series

Shuttle's HR70 series face recognition system is an All-in-One model with two built-in full HD cameras. The face recognition angle is dual-axis ± 15 degrees to provide non-invasive, non-contact face recognition. The HR70 series is equipped with Intel® high-performance dual-core processor to enhance recognition speed and provide highly accurate recognition capability. The HR70 series features built-in RS232, RS485, and GPIO controllers to support various peripherals and to provide versatile application capabilities. The HR70 series is the best solution for attendance systems and entrance access control for small & medium business, government, banks, education, research institutions, and community applications.

Rapid and Accurate Identification Capability

Shuttle's HR70 series is equipped with an Intel® high-performance dual-core processor to effectively enhance its database search and facial recognition capabilities. The system's False Acceptance Rate (FAR) is less than 0.01%, and its False Rejection Rate (FRR) is less than 1.9%. The HR70 series features two LED lights to provide fast and highly accurate identification ability that can be used in low-light environments.

Flexible Multifunction Configuration

Shuttle's HR70 series has two built-in Full HD cameras. It can detect persons within a 140cm-200cm height range from a distance of up to 60cm from the device. Its face recognition angle is dual-axis ± 15 degrees (shot from the side or from above/below). The series has two verification combination choices: 1) ID+ face or 2) face, fingerprint, and RFID all in one.

Multiple Interfaces

Shuttle's HR70 series is fit for diverse applications with built-in RS232, RS485, and GPIO controllers that support a variety of related peripherals. Among these controllers, GPIO can be used in access control solutions that allow users to strictly control the access security. This interface can further be integrated with VIP membership control mechanisms to provide optional services.

Application Fields

- Visitor registration
- Employee attendance management
- Access Control
- Airport Immigration system

Store and Share the Great Moments in Life with OMNINAS

Shuttle's NAS product line called "OMNINAS" consists of network attached-storage devices that feature powerful data storage, backup, security, and multiple servers. OMNINAS is designed to become one's hub of multimedia content to make sure users always have access to their files via Android or iOS mobile devices.

Convenient Hot Swap Function

The OMNINAS has a unique HDD tray design that simplifies HDD installation and also supports the One-button Hot-Swap function.

RAID 1

In RAID 1 mode, users can easily replace backup HDDs with a simple click of a button while the system is still running. This feature also provides HDD data safety backup protection.

Hotspot Function

The OMNINAS has a built-in Wireless AP* that supports the Hotspot function. This allows the OMNINAS to extend its application environment to the wireless network and all Wi-Fi compatible devices at home or in the office, making and makes digital content accessible worldwide. Users can search and access the NAS database directly and experience its convenience wirelessly.

*Wireless AP depending on model.

Superb Transfer Performance

The OMNINAS offers superb transfer performance with speeds of up to 110MB/s*. It allows multiple users to access the data simultaneously and is designed specifically for small offices, workgroups or home use.

*Transfer performance depending on model and system environment.

1. Acronis True Image backup software

The OMNINAS models come bundled with a copy of *Acronis True Image Personal Edition software. This utility provides powerful data backup capabilities that support full backups or selected backups of key files, enhanced flexibility and convenience of data backups.

*Acronis backup software will vary depending on the model.

2. USB 3.0 & SD Card Reader

The OMNINAS comes with USB 3.0 high-speed ports that boast transfer rates of up to 5.0Gbps (640Mbyte/sec) - around 10 times faster than USB 2.0. The built-in SD card reader with "Auto Copy" function stores digital content to the NAS quickly and conveniently.

3. Supports RAID 0/1/JBOD modes

The OMNINAS supports RAID 0, RAID 1 and JBOD mode. Users are free to choose which mode is right for them - highest read/write performance (RAID 0), best data protection (RAID 1) or largest useful capacity (JBOD).

4. Energy-saving and Green Power design

The OMNINAS design conforms to international IEEE802.3az Energy-Efficient Ethernet standard and the minimum power consumption of only 9W. The eco-friendly Green Power design of the OMNINAS saves energy and costs at the same time.

* Minimum power consumption depending on model.

5. Powerful & Multiple server functions

Print Server

The OMNINAS works as a print server. Simply connect a printer to the NAS to share copies over the network.

iTunes Server

Creating an iTunes server based on an OMNINAS is easy and allows users to play back media content and stream it directly to devices with iTunes clients over a network.

DLNA Media Server - Twonky

The integrated Twonky DLNA Media Server software automatically sorts media stored on the NAS so that users no longer need to spend time organizing files. High compatibility with other DLNA devices and support for a wide range of multimedia formats enables the OMNINAS to easily play more multimedia content.

TWONKYSERVER™

6. Excellent cooling design

The OMNINAS uses 2.5mm thick stylish aluminum for its casing which not only blends in with home design but also serves as a smart low-noise cooling system. The fan speed adjusts automatically in order to ensure reliable and quiet operation.

Find the business solution you're looking for with Shuttle

Shuttle's mini PC, Slim PC, and All-in-One hardware solutions are designed for diverse commercial application, including Digital Signage, Kiosk, Menu Board, Video Wall, and POS. Whether your business is in retail, hospitality, banking, corporate office, transportation, healthcare, security, or education, Shuttle has the right solution to help your business succeed.

Home Medicare

AIO applied in nursing homes to support communications systems and increase patient health and safety.

Point-Of-Sale

A cost effective POS system designed to handle the various daily operations throughout hospitality and retail markets.

Digital Signage

Retail:

Display rich interactive media content to engage customers and drive sales. Decrease perceived wait time and improve customer experience.

Hotel:

Manage and communicate information about customer service, hotel events, and room rates from a central location

Bank:

Provide instant financial information relating to the stock market, global exchange rates, and internal bank programs.

Public Transportation:

Display important flight information, power multi-touch way finding kiosks, or generate revenue from ad space.
